Trail Mix: 
News & Notes From The Club

The Hua Davis Wilderness Scholarship

The Hua Davis Wilderness Scholarship is being set up in memory of Hua, an avid hiker and nature lover, who unfortunately passed away from hypothermia after summiting MacNaughton Mt. in the Adirondacks.

Davis’ daughter Echo and son-in-law Steve want to help other hikers avoid the mistakes that Hua made, and are setting up this scholarship in conjunction with Search and Rescue of the Northern Adirondacks, which is an all-volunteer 501(c)3 organization based in Saranac Lake; they will administer the fund.

The scholarship money will go towards helping individuals pay for classes in wilderness survival and medicine. Davis’ family hopes that the tragedy of her passing will inspire others to learn more about safely travelling in the backcountry.

Adopt-A-Highway and Trail Maintenance

Thanks to all who helped with our biannual volunteer efforts! We had a phenomenal turnout. Please keep it up. Volunteers demonstrate our Club’s commitment to the welfare of the Catskills.

We had an amazing 19 people for Adopt-A-Highway! So many we were able to get in and clean up some of the off road areas around Notch Lake and along the Devil’s Path. Many thanks to Michele Farrell, Renee Gerber, Nicholas Hepler, Linda Kukol, Charlie Lutomski, Pamela Martin, Anna Martone, Tom Martone, George Preoteasa, John T. Reilly, Berms Rothchild, Laura Sanford, Debby Shemella, Ted Shemella, Audrey Taylor, Carol White, Dave White, Mike Young!

The President's Column

Have you ever wondered how our list of the 3500 peaks got started? Browsing through the back Canisters I found an article which covered the subject.

Back in 1848 a young scientist from Switzerland, Henri Guyot, came to the United States and started what would become his life’s work; mapping, measuring and exploring the Appalachian Mountain chain from New England to Georgia. After living mainly in Massachusetts with varied employment for the first six years he was appointed to a professorship at Princeton University. Here he remained until his death in 1884. Here he wrote many research papers & co-authored a set of geographic books for schools.

Every summer he took to the hills covering a variety of mountains throughout the eastern US including the White Mountains, Adirondacks & the Catskills.

Between 1860 and 1870 he spent much of his time exploring in the Catskills. During this time he and his aids mapped the location of all “the peaks of consequence” and their elevation. They also named and renamed others trying to reduce the number of repetitive names. At first, like many, they assumed that Kaaterskill High Peak was the highest in the range, however in a short time they discovered that Blackhead was higher, their measurement being 3945' to Kaaterskills 3664'.

His assistant, Henry Kimball, who had been climbing here since 1847 had a feeling that Hunter was higher and convinced him to go with him and measure it, at 4038' it indeed was the highest. Not until 1872 at the age of 65 did he climb and measure Slide and declared it the highest at 4205'.

Before he was through 27 of our 35 peaks were named, measured and listed. Below is the list with parentheses denoting his names for the mountains he climbed before 1880.

STUDENT CONSERVATION ASSOCIATION

When the 3500 Club board of directors discussed our 2016 Summit Steward program, we learned that the Student Conservation Association has deployed young people in the Catskill Park as back country stewards.

The SCA puts 8,500 volunteers on the ground in public lands, national and urban parks, wildlife habitats and green spaces across the United States. They create and clear trails, educate school groups, conduct research, band and monitor animals, remove invasive weeds, and more.

Not only does vital work get done, equally important is getting young people involved in planning, leading, and improving environments nationwide. Of their 75,000 alumni, more than 70% are employed or studying in conservation-related fields today! In 2016, they are focusing on underserved communities to give every person who wants to improve the environment the chance to make a difference. Yet the SCA must say “no” to 9 out of 10 applicants because resources currently won’t accommodate more!

In this 100th anniversary of the National Park Service, visit the Student Conservation Association’s interesting website, www.thesca.org and see how this worthy organization makes a little go a long way—and with more support, they can do more.

Creating leaders for the environment: all in a day’s work.

Climbed:

Slide, Hunter, Black Dome, Thomas Cole (Kimball), Blackhead, Westkill (Big Westkill), Doubletop, Graham, Table (Friday), Peekamoose (Peak O’ Moose), Plateau (Stony), Sugarloaf (Mink), Wittenberg (Great Wittenberg), Lone, Panther (Pantherkill), Friday (Cornell), Rusk (Evergreen), High Peak (Kaaterskill), Twin (Schoharie), Fir (Sprucetop), Eagle, Balsam, Bearpen, Indian Head, Vly (Deep Hollow), Windham High Peak (Vlaie or Fly) and Halcott.

Not Climbed:

Balsam Lake, Balsam Cap, North Dome, Sherrill and Rocky.

Not sure:

Cornell and Big Indian.

He forever changed the view of the Catskills. In his words; “The wilderness of the Adirondacks is more extensive but hardly more complete than that of the pathless forests of the Southern Catskills, the haunts of numerous bear, wildcats, and occasional panthers.”

In Memoriam

Henry Halama, member #1647, of Woodstock, died on 06/20/15 at the age of 86. He was an outgoing and generous man who invited us into his home the day we met him. He was also an ADK 46er #2742, having climbed them with his daughter Caroline H. Ford.

Hua Davis, member #2507 and winter #1007, died while climbing in the Adirondacks where she was member #8882. See announcement of a scholarship in her memory.

Warren E Reynolds, member #721, winter #260, and ADK 46er #644W.

Mildred F Adriance, member #678 and ADK 46er #2656.

Samuel B Hagner, member #587 passed away this past February.

### Assumed Risk
Hiking involves certain inherent risks and persons participating do so at their own risk. In cool weather, hike participants should avoid cotton clothing, as it retains dampness and the resulting chill can result in hypothermia, **which can lead to death.** In summer participants should have available in their pack garments of wool or fleece and a headlamp, should one have to unexpectedly spend the night in the mountains. Anyone not properly equipped may be refused permission to participate, at the leader’s absolute discretion.

### Rating System
Please be advised that the hikes listed herein would most likely be rated more difficult by clubs who hike in non-mountainous terrains.
